

Meltron receives first significant order for street lights from Metsä

Meltron has received a new, additional order from the Metsä Group, this time for 200 street lights for the industrial premises of a Metsä Board facility in *Rauma* in Finland. The order followed several weeks test installation of four competing luminaries supplied by Meltron, another Finnish supplier and two highly recognized global suppliers. The over-all quality and superior optics creating a uniform distribution of light was a decisive factor for Metsä's selection of Meltron as supplier. The order value is in excess of 50 k€. Just before last Christmas, Metsä Board purchased Meltron's High Bay luminaries for another plant in *Äänekoski* in Finland.

- I am delighted about this order, as Meltron was chosen by Metsä-Group after a tough test installation of with four competitors, says Ville Sistonen, CEO of Meltron. Metsä Group is investing heavily at the moment, and Meltron is committed to serving them also in the future.

The street light segment is very competitive and it has taken a long time for Meltron's unique street light system to be recognized. We believe it has enormous long-term opportunities, says Ville Sistonen.
